Charging & Power On

First Time Use

SOL PA501 is under “Battery Ship Mode” and will not power on to preserve the battery and prevent power loss.

To enable “Regular Mode” and activate the battery, please connect the power adapter to power on.

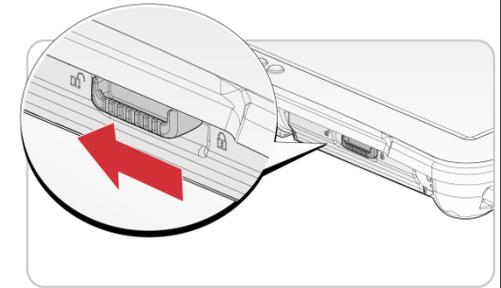

1. Install the external battery cover over the battery connector.
2. Flip open the DC-IN cover to expose the DC-IN jack.
3. Connect the AC adapter to the DC-IN port.
4. After charging, disconnect the AC adapter.
5. Replace the DC-IN cover by angling the rear side at an angle.
6. Press the front open end down in the compartment to seal in place.
7. After SOL PA501 is fully charged, press and hold the power button until the screen lights. The device runs through the start up sequence and powers up.

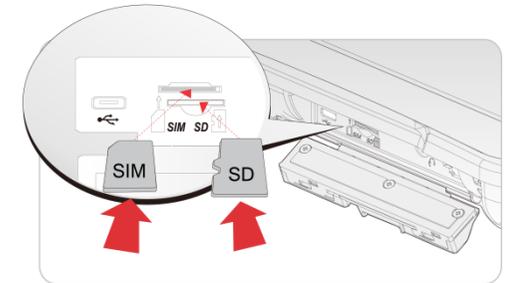

Micro SD Card & SIM Card Installation

SOL PA501 includes a SD slot for storage expansion and two SIM slots (one at the side and the other at the back) for cellular and wireless connection.

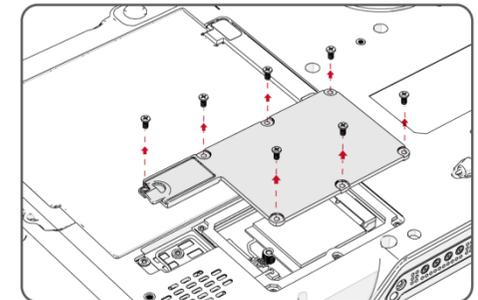

1. Power off the SOL PA501 and unlock the latch.
2. Open the I/O compartment cover.

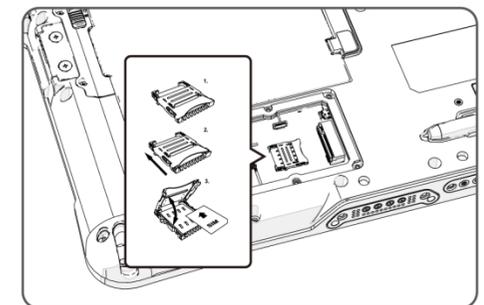

3. Take the Micro SD and SIM card from its packaging respectively.
4. Insert the Micro SD and SIM card into the slots, making sure the beveled edge is aligned in the slots.

1. Power off the SOL PA501.
2. Remove the service door and its screws.

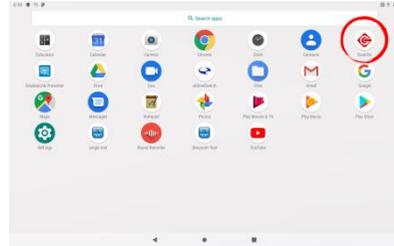

3. Take the Micro SIM card from its packaging.
4. Push the SIM card cover to open and place the Micro SIM card to the slot.
5. Close the SIM card cover.

DashON Overview

RuggON DashON is developed for multiple useful functions. Click on DashON to enter the purpose-built and easy-to-use software.

DashON offers battery health conditions monitoring and button setting/button lock/ touch lock/ touch setting/ ignition monitor/passthrough switch functions.
